

ALL BEGINNERS ARE WORTHY OF SAVING

Q-sai@ is working on increasing the population of music lovers

Anyone can play the guitar easily with the help of Qactus
 Playing music should not be mechanical. "The faculty of feeling" is everything.

Any musical instrument can't be played well by beginners at first try.
 This case is the same for people without any previous experience with any musical instrument.
 People who have experienced the joy of playing music would probably become music lovers and would probably look for more ways of learning.
 The assistant tool Qactus by Q-sai and UNISTA is going to break through the many problems of beginners to help them play music in a fun and simple way and to help people look for more ways of learning how to play music.
 Qactus wants to make it possible for you to learn how to play music pieces in a short period of time so you can feel the enjoyment of playing music on your own.
 Qactus doesn't say, however, that playing musical instruments, including guitars, is an easy thing to do because of the wide range of their kind.
 These musical instruments require different ways, techniques, and skills.
 Qactus aims to lower the difficulties that beginners might encounter.
 Many people gave up music because of the difficulties that seemed impossible to solve.
 Qactus is here to help you try break these difficulties and to help you enjoy the fun that is music.

there are two ways to play music

Being Technical ← → Playing Music

(to play music relying on musical notes and chords instead of using one's own ears) (to produce music relying on harmony and rhythm and using one's own ears)

Many beginners think that "To Play Music" you have to be "technical" Players should be able to play by the ears and not be limited by the notes

- Boring
- Painful
- Depressive
- A lot of fun
- Feels good
- Impressive

Sounds not good ← → Sounds Cool

These are different even if it looks the same

You can go over the first step easier because Qactus makes you feel like being a skillful player. It will be able to give you a lot of tips to improve.

You can remove Qactus when you feel you've improved

Qactus and QactusCore will change the way on how beginners can improve in their guitar playing

It should be "Playing Music", not "Being Technical"

It will lead you to the next step with minimum efforts. Qactus+QactusCore will assist you until you're confident enough to not need it.

Qactus has the three ways to help beginners out

1 Qactus helps you know the condition of your guitar.

The physical condition of guitars may change depending on how the user uses or stores it. These changes may affect the performance of the guitar when played. Sometimes, the guitar no longer remains a musical instrument. However, most beginner guitar players do not know this and sometimes, they attribute the imperfect production of music to their skills without knowing that the guitar itself may have caused the problem. It sometimes results to the frustration on the part of the player. Aspiring guitar players should know that the guitar's condition is a vital factor to the production of good music. Here is the part where Qactus comes in. Qactus will help you determine the condition of your guitar. Aside from that, Qactus can actually help you make your guitar's condition properly.

2 Qactus minimizes the difficulties you might encounter as a beginner.

Being a beginner might be very a difficult stage to some. You might encounter mistakes or frustrations that may make you want to stop trying doing something new. A musical instrument, for one, may seem very difficult to learn. Qactus can transform your guitar into an instrument that is easy to play. A remarkable thing you can do with Qactus is that it decreases the effort you put in pressing the strings, or muting. Difficulties encountered by beginners will be minimized, resulting to a satisfactory musical experience. Due to this, beginners will feel their improvement more. You might even want to play your guitar all the time. Beginners might even find they might be able to master a whole song in hours. Qactus works by lessening the difficulties you might encounter so you will have more time to focus on your practice. Qactus is also suitable for those who have given up on practicing as it allows them to restart training in an easier way. Qactus will make you feel better.

3 Qactus fosters harmony and friendship between differences.

Aside from helping you improve your skill, Qactus will also allow you to meet new people. Through QactusCore and QactusCore-Method, beginner, expert and professional guitar players can meet online to help each other out. Puzzles and diagrams are available to help beginners learn guitar chords in a fun way. Qactus promotes togetherness and cooperative work we see among music groups. Harmony is essential in playing musical instruments but it doesn't pertain only to music. Harmony among music players is also important. With Qactus, musical harmony and social harmony is possible to be achieved and improved. Qactus' goal is to help people learn how to play the guitar and to use music in bringing people together. Music is not only the sound we produce in plucking a string, pressing a key or striking a drum. Music is the product of music instrument, people and feelings. Here in Qactus, we believe that "playing music" is not simply a mechanical operation of an instrument to produce sounds as we believe that feelings are an important ingredient in creating music for "feelings are the raw materials of music."
